

HelloToast acarpio [CarpioAlex/acarpio_HelloToast](#)

Not much extra added, I only overwrote onSaveInstanceState to keep the count when switching orientation.

```
1. @Override public void onSaveInstanceState(Bundle savedInstanceState) {  
    super.onSaveInstanceState(savedInstanceState);  
    savedInstanceState.putInt("COUNT_INDEX", count);  
}  
2. if (savedInstanceState != null) {  
    count = savedInstanceState.getInt("COUNT_INDEX", 0);  
    showCount.setText(String.valueOf(count));  
} else {  
    count = 0;  
    showCount.setText(String.valueOf(count));  
}  
3.
```
